CUT 1 EACH OUT OF BLACK FELT FOR EYE PUPILS

CUT 1 EACH OUT OF GREEN FELT FOR STEM

CUT 1 OUT OF GREEN FELT FOR LEAF

CUT 2 OUT OF ORANGE FELT: 1 FOR THE FRONT + 1 FOR THE BACK

MATERIALS

- Felt: orange, green, white, black, pink
- Embroidery FLOSS: orange, green, white, black, pink
- Embroidery needle
- WOOL OR POLY-FIL STUFFING

INSTRUCTIONS

1. Cut out paper pattern pieces and pin to felt in colours noted beside each pattern piece. For the smaller pieces, you can trace them in chalk or erasable marking pen. Cut out your felt pieces.
2. On one of your orange (main) pieces, pin on white 'eye' pieces in the places indicated by the dotted line on the pattern. Sew in place using the white embroidery floss in straight stitch. Do the same for the black eye pieces, using black floss.
3. Pin the pink 'cheek' pieces in the position indicated by the dotted line. Sew in place with pink embroidery floss.
4. Using straight stitch, embroider a mouth on your pumpkin, either on the spot shown or wherever you'd like it to be! You can use chalk or a fabric pen to mark line first.
5. Pin your green stem piece onto the front of your main orange front piece in the position shown by the green dotted line on the pattern. Sew onto pumpkin using straight stitch just along the bottom.
6. On your leaf you can sew on some lines if you'd like using straight stitch. Attach your leaf to the inside edge of your stem with a few small stitches at the leaf base.
7. Place the front and back (main) pieces with wrong sides together; pin in place. Starting at the bottom edge of your stem, use green floss and blanket stitch to sew up around the stem. Knot + trim end at back.
8. Switch to orange floss and continue around the pumpkin, stopping at 3/4 of the way around. Stuff the pumpkin, starting with the stem, then continue blanket stitch to end. Knot end securely at back and trim ends.

Enjoy your wee pumpkin!
